

Clinic-Call Configuration Questions

Each time a new system is planned there are some basic configuration questions that need to be answered. The following is the basic starting point for all Medical Office Building Clinics:

1. Home many Exam Rooms are there? _____
2. How many Providers? _____
(This determines the number of Buttons / Colors)
3. Do all providers cover all exam rooms? _____
(The answer to this is almost always "Yes". However this is seldom the truth. In most cases Exam Rooms are tied to procedures, which mean to a skill set and tools, which limits the number of providers. Explore this and you will probably find that each provider covers no more than 4 rooms and there are no more than 3 providers or care levels per room.)
4. Do they want "Provider Call for Assistance"? (Emergency Call) _____
5. Do they want Corridor Lights? _____
(Are the corridors long and narrow requiring wide viewing angle Corridor Lights.)
6. Do any of the Exam Rooms require special features such as Dilation Timer? _____
7. Do they want simple "ON / OFF" operation or "ON Steady / Flash / OFF"? _____
8. Do they want "Doctor Follow"? (Next Patient feature) _____
9. How many Annunciation locations for the same rooms? _____
(Nurses Stations, Receptionist, Private Offices, Labs, Etc.)
10. Can some of the areas in number "4" above use a Zone Light for annunciation? _____
11. Do Zone Lights need "TONE"? _____
12. Does any Annunciator locations need "Exam Room Reset"? _____
13. Does any Annunciator locations need "Patient Arrival" _____
14. Do they have any special Procedure Rooms with special needs? _____
15. Do they have any Public Rest Rooms? (Pull Stations) _____
16. Do they want a 5000-GUI PC Annunciator / Report Manager? _____
