- Simple Installation and Configuration
- User Friendly Controls
- Interfaces with Existing Phone System
- Easily Customizable and Expandable
- Flexible Connectivity
- Engineered and Built in the U.S.A.
- 36-Month Limited Warranty - See website for details

Assisted living facilities have their own unique requirements. While most traditional systems are designed for hospitals, the Tech Works Voice Call Series has been created specifically with assisted living in mind. Staff can be equipped to monitor via flexible channels, from wireless to fully integrated into their PBX system.

Our Voice Call system incorporates Tech Works unified technology, integrating standard telephone and digital control and using simple wiring. This enables the Voice Call system to operate over any standard medium, including conventional telephone wire, fiber optic, or even microwave transmission.

All Voice Call system components are completely modular, enabling facilities to design a system custom-tailored to their needs. The Tech Works Voice Call system is low cost, easy to install, and full of the features you'd expect.
