- Simple Installation and Configuration
- User Friendly Controls
- Interfaces with Existing Phone System
- Easily Customizable and Expandable
- Flexible Connectivity
- Engineered and Built in the U.S.A.
- 36-Month Limited Warranty - See website for details

With large properties like shopping centers, or entertainment venues, communication isn't as simple as one person talking to another. Many times someone in a location such as a stairwell or parking garage needs assistance and when they push the button, they need to know someone will answer their call. Tech Works helps answer that call with our IC Series of intercom products. When a button is pushed at one of the remote locations, the central station is notified and an attendant can answer the call from the central station or even an optional cordless telephone.

How ever you choose to configure your system, rest assured Tech Works will help you answer the call.

Features

- | | |
|----------------------------|---|
| Redundant Circuitry | Allows for call processing even in the event of audio failure |
| Call Routing | Directly interface with existing PBX system |
| Cabling Schemes | Free topology wiring allows for flexibility |
