

Application Guide Nurse Call

Benefits

- Eliminates Need for Central Controller
- Easily Customizable and Expandable
- User Friendly Operation
- Simple Installation and Configuration
- Engineered and Built in the U.S.A.
- 36-Month Limited Warranty - See website for details

With recent advances in modern medicine, many routine medical and surgical procedures can now be performed on an outpatient basis, no longer requiring the expense and inconvenience of multi-day hospital stays. Nonetheless, patient prep and recovery areas need to offer the same safety measures, including nurse and emergency call communications. Tech Works NC Series systems can be easily configured to fill these requirements. Staff can be equipped to monitor via flexible channels, from wireless to fully integrated into their PBX system.

Incorporating the Tech Works unified technology, the NC Series integrates standard telephone and digital control on a single twisted pair of wires. This enables the NC Series to operate flawlessly over any standard medium, including conventional telephone wire, fiber optic, and more!

Features

- | | |
|-------------------------|---|
| Modular | Enables a facility to design a system custom-tailored to their specific needs |
| Fully Integrated | Uses Tech Works unified technology and operates over any standard medium |
| Flexible | Designed to handle all of a clinic's operational communication needs |
| ADA Compliant | Call switches feature visual call acknowledgement |
