

Application Guide Police Station Complete Intercom

Benefits

- Durable and Reliable
- User Friendly Operation
- Easy to Install and Expand
- Easily customizable
- High Quality Audio
- Engineered and Built in the U.S.A.
- 36-Month Limited Warranty - See website for details

Unlike prisons and county jails, police stations only house holding cells used when a suspect is being held for questioning, but before they are sentenced or transferred to a larger facility. A typical station houses up to 4 holding cells, a sally port, and both a front and back security door. These security doors typically remain unlocked during normal business hours but need to be locked at a certain time of day for the safety of the staff inside. But since police stations are 24 hour facilities, access still needs to be made through the security doors.

The ICM Series was designed with the needs of the local police station in mind. Couple each Intercom Master Station with up to 8 remote stations, making it a perfect fit. A typical system uses a Vandal Proof Speaker Station in each cell along with one at each door and one on each side of the sally port; couple those with the Intercom Master Station and clear, reliable, intelligible, communication happens 24 hours a day.
